

Long-Term Development Strategy

With global investments in energy generation, transmission and distribution across four continents, Power Assets serves millions of customers with power and heating.

Three key principles underpin our growth and development

Grow shareholder value through expertise and innovation

The Group aspires to deliver long-term earnings growth through investing in a portfolio of carefully selected companies. Supported by our loyal base of committed shareholders who share this ethos, Power Assets pursues this goal by addressing itself to sectors where it has natural expertise, within stable, well-structured international markets: namely, renewables, energy-from-waste, electricity, and oil and gas infrastructure businesses.

We actively invest in innovation to improve energy affordability and reliability, and support worldwide efforts to combat climate change. Our innovation and development focus seeks to improve our performance across the board in a range of areas including decarbonisation, automation, storage and transmission of renewable energy, support for distributed power generation, electric transportation, smart metering and grid technology, emissions reduction and energy efficiency.

Pursue global diversification while minimising risks

Power Assets' approach to expanding its portfolio is active but disciplined. First we identify and rigorously evaluate suitable opportunities that operate in stable, well-regulated energy markets around the world to deliver progress with minimal impact on investor risk. We target enterprises that are appropriately priced and yield steady revenues under government regulation, or whose income is safeguarded by long-term power purchase agreements. Our due diligence process ensures that the technologies, sources of fuel and customer base of potential investments are proven and sustainable.

The Group is active in Europe, North America, Asia and Australia to minimise exposure to the economic cycles of any one single market.

Maintain a strong balance sheet as a foundation for agility

Power Assets believes that a strong balance sheet is the foundation of sustainable growth. Since 2018, we have maintained a long-term issuer credit rating of "A" from Standard and Poor's in recognition of our prudent financial management. This credit rating and our strong cash position give us sufficient financial power to be agile while pursuing appropriate opportunities.
